Easton Staff Development Review
MEETING AGENDA

Wednesday, February 26, 2025 - 11:00 AM
Council Chambers, Easton Town Office
14 S Harrison Street

1. Discussion Items

a.

Application Number:	2025 - 1369 / ESDR 25 - 01
Applicant:	Lane Engineering LLC
Location:	28580 Mary's Court (Somerset Well Drilling) Tax Map 0025, Parcel 0046, Lots 16 & 20
Zoning District:	BC
Request:	Sketch site plan review for the addition of two (2) 3-sided pole buildings with associated stormwater management facilities and other facility improvements.

b.

Application Number:	2025 - 1391 / ESDR 25 - 04
Applicant:	Lane Engineering LLC
Location:	8275 Ocean Gateway Tax Map 0103, Grid 00EA, Parcel 2861
Zoning District:	CG
Request:	Sketch site plan review for the redevelopment of the existing property and structure to be converted to a fast-food establishment (Zaxbys).

TOWN OF
EASTON
Project Status

Date: 1/24/2025
Project Name: Somerset Well Drilling
Project Address: 28580 Marys Court
Description of Project: (2) 9,000 SF storage buildings, gravel access, SWM, abandonment of existing SDA, utility connections, reservation of (2) 8,000 SF future building locations. A subdivision of the site is anticipated but not currently submitted to the Town.

Easton Staff Development Review Worksheet

Date: January 22, 2025
Project: 28580 Mary's Court
To: Brittany Wallace, Lane Engineering, LLC.
CC: Somerset Well Drilling Co., Inc % Mike Hall

The Easton Staff Development Review (ESDR) Committee meeting was held on January 22nd at 11:00 am. Staff reviewed the proposed Site Sketch Plan for a proposed addition of two 3-sided pole buildings for storage and gravel access with associated SWM, removal of existing septic system, installation of a new grinder pump and force main system and abandonment of two existing sewage reserve areas, located at 28580 Mary's Court, Lots 16 & 20, also known as Tax Map 025, Parcel 46.

The Committee determined that the project will need to address all agency comments as specified in the attached review letters and at ESDR. It was determined by the Committee that due to the additional changes required by the Committee, the application will return to the next available ESDR meeting. Please submit all revised documents.

At this time, based on the ESDR sketch plan submission, Staff did not identify any constraints which would require action by the Board of Zoning Appeals.

The next Easton Staff Development Review (ESDR) meeting is scheduled for **Wednesday, February 26, 2025 at 11:00 am.** Submit all documentation to the Planning and Zoning Department no later than Wednesday, February 5th at 12:00 pm. Provide a digital submittal (via email) of all supporting documents necessary for the ESDR review, including **three paper copies**.

Please contact the Planning & Zoning Department at 410 822-1943 with any questions.
Sincerely,

Joseph A. Mayer
Plan Reviewer

TOWN OF EASTON

SUBJECT: **28580 Mary's Court, Lots 16 & 20**

We reviewed the **January 2, 2025** Sketch Plan Submittal for the Subject Project and have the following comments:

PLANNING & ZONING COMMENTS

Sketch Site Plan Review #1

1. Per Appendix B, Sketch Plan Submittal Checklist requires *conceptual building elevations or renderings illustrating the character, scale, and materials of all proposed structures. Such elevations or renderings shall be sealed by a licensed professional as described above.* Provide a color elevation for the exterior of the proposed buildings.

2. The ESDR Application indicates two three-sided pole buildings. The architectural plans depict a four-sided building with garage doors. Please revise.

3. Per Appendix B, Sketch Plan Submittal Checklist, show the location of the refuse collection for the proposed buildings.

4. Per Chapter 28-1007.3.A.6 of the Zoning Code, Include a statement regarding *"the nature of the proposed use, its expected impact on its surrounding area, expected truck traffic, and any other information necessary to provide a fair and accurate assessment of the impacts of the proposed use on the subject property and the surrounding area."*

5. Show the truck loading space location and its dimensions on the sketch plan. Each loading space shall be not less than ten (10) feet in width and forty-five (45) feet in length, and shall have a minimum overhead clearance of fourteen (14) feet.

6. Per item #8 on the Appendix B-1 Submittal Checklist and Chapter 28-901.3 A 1 of the Zoning Code, show the location of proposed fencing on the sketch plan. Indicate the

type of fencing and its minimum height.

7. Show all entrance and garage locations to proposed buildings on all plan views.
8. Provide dimensions between the building units (existing, proposed & future) and property lines.
9. Label all existing road paving widths on all plan views.
10. Dimension the width of the proposed gravel pavement.
11. Revise *Development Data *Note* on Existing Conditions Plan, sheet 1 of 2, to reference the Critical Area Commission's condition of obtaining approval within the 120 days of the Commission's approval dated November 6, 2024.
12. Revise *Development Data Phasing Note* on Existing Conditions Plan, sheet 1 of 2, elaborate more in detail if the drive aisles and parking facilities for future buildings 'C' and 'D' will be constructed during Phase 2.
13. The *Project Notes* and *Comprehensive Plan Design Principles Response Narrative* have overlapping text on the Existing Conditions Plan, sheet 1 of 2. Revise text for legibility.
14. Per Appendix B, Sketch Plan Submittal Checklist, *general location and description (r.e. intended function, proposed species, etc.) of proposed landscaping.* Describe the species for the proposed shrub hedge.
15. There are two designated existing parking facilities. The minimum number of accessible parking spaces must be determined separately for each parking facility. (§ 208.3 from the ADA Standards for Accessible Design). Show the existing parking spaces for the two parking facilities and provide the minimum number of accessible parking spaces (§ 208.2). Please revise all site plan views. In addition, will the required parking for proposed building 'A' and 'B' be utilized within the existing parking lots?
16. Revise the *Parking Required* within the Development Data on the Existing Conditions Plan, sheet 1 of 2, to include the existing parking requirements
17. Prior to Development Site Plan approval, verify and add slope information for all ADA spaces, ramps, access aisles and landing areas. Check all ADA related spot elevations and obtain approval from the Building Inspection Department.
18. Prior to Development Site Plan approval, provide Van Accessible ADA Parking Sign Detail to include the sign "*No Parking in Access Aisle*" with an arrow pointing to the access aisle, place bollards at ADA aisles adjacent to the buildings with details and dimension between the bollards to verify ADA access.

Plan Review Status

Sketch Site Plan Review			Comments
Plans Approved	☐Y	☒ N	Please review the comments above. Revise and resubmit.
Forest Stand Delineation & Forest Conservation Plan			
☐ Required ☐ Submitted ☒ **Approved**			***The Easton Forest Conservation Requirements of the Town Code, Article III, § 31-3.1 Relevance, states that the requirements are applicable to any person making application for a subdivision, project plan, grading, or sediment and erosion control approval on units of land 40,000 square feet or greater after the effective date of the Ordinance.*** **Analysis** - The development of this site has already been mitigated for Forest Conservation under the 1997 Forest Conservation Plan, recorded on record plat MAS 4/35G. Any impact into the existing Forest Conservation area would require an updated plan. **See the Critical Area Commission requirements below for the Forest Protection Areas.**
Other			
☒ **Required** ☐ Submitted ☐ Approved			**IMPACT FEES** **Please note, any future buildings will require Impact Fees. The Town's Impact Fees and Inspection Fees are to be paid upon the time you pick up your Building Permit. Please provide building square footage with appropriate use for calculation of Impact Fee.** **Any required Talbot County Impact Fees are due prior to obtaining your Building Permit. Please provide receipt of payment to the Town's Building Inspection Division.** **Demolition Permit Application** **To be submitted to the Building Inspection Division for review.** **Fence Permit Application** **To be submitted to the Building Inspection Division for review.** **Critical Area Commission** ***On November 6, 2024, the Critical Area Commission concurred that the growth allocation request could be reviewed as a refinement to the Town's Critical Area program. At that same meeting, the growth allocation request to redesignate 8.348 acres of land from Resource Conservation Area (RCA) to Intensely Developed Area (IDA), as provided on the site plan and accompanying materials accepted by Commission staff on August 13, 2024, with the following conditions:*** ***1. All areas of forest on Lots 16 and 20 shall be placed in a Forest Protection Area easement (excluding the existing Drainage Easement and Stormwater Management Easement).*** ***2. The remaining areas of Buffer on Lot 16 shall be fully established in accordance with COMAR 27.01.09 and §28-401.4 of the Town of Easton's Zoning Code.*** ***3. Within 120 days of Commission approval, the Town shall submit the following to Commission staff:*** ***a. A copy of the recorded line revision plat showing:***

	I. The consolidation of Lots 20 and 16; ***Ii. The new zoning designation of revised Lot 16; and*** ***Iii. The revised Forest Protection Area encompassing all existing forest onsite (excluding the existing Drainage Easement and Stormwater Management Easement) and the area of Buffer establishment on Lot 16.*** ***b. A Buffer Management Plan in accordance with COMAR 27.01.09 showing full Buffer establishment on Lot 16 and its inclusion in the Forest Protection Area and a signed Planting Agreement Form.*** ***c. A copy of all final reviews or authorizations regarding stormwater management, sediment and erosion control, and DNR Wildlife and Heritage Service (WHS).*** **Analysis -** Please submit all required items and obtain approval/recordation prior to the 120 days of Critical Area Commission approval dated November 6, 2024.

Please contact me if you have any questions. Thank you.

TOWN OF
EASTON
ENGINEERING DEPARTMENT

DATE: **January 22, 2025**

TO: **Brittany Wallace - Lane Engineering**

cc: **Sierra Clem - Town of Easton**

FROM: **Rick Van Emburgh, P.E. – Town Engineer**

SUBJECT: **Somerset Well Drilling**
Sketch Site Plan &
Sketch Stormwater Management Plan

I reviewed the Application for the Subject project received on 1/02/2025.

The **Sketch Site Plan and Sketch Stormwater Management Plan should be revised to address the following before Planning Commission:**

1. POI#3 indicates an increase in runoff . Please revise.
2. Provide Critical Area 10% Rule Calculations in the form of the State Spreadsheet for each of the 3 Drainage Areas. The RR Required and Provided should be added to the ESD SUMMARY CHART on Sheet 2 of 2.

Please address the comments above and submit a revised Sketch Site Plan and Sketch Stormwater Management Plan.

Office of Building Inspection.

ESDR- Building Inspection and Permit Department Comments

Date: January 21, 2025

Project; 28520 Mary's Court Somerset Well Drilling Co.

A Town of Easton Building Permit is required for all new construction.
Information regarding Building Construction is not the same as listed in your application.

Contact this Department and verify current Building Codes including the Town of Easton's modifications prior to preparation of Building plans.

The following lists items required on the construction drawings in order to apply for a Building Permit for a three sided open storage building.

- Construction Documents (3 sets) for any new construction will be required. Documents must be prepared by a registered Maryland Registered Architect, with original plans signed and sealed. A code analysis completed by a Registered Maryland Architect including, classification (use group), construction type, and occupant loads must be completed and included with the application materials.
- An appointment may be set up with this department to review your permit application materials prior to permit application submission.

FROM: Brennan E. Greene, LEHS BEG
Director of Environmental Health

DATE: January 8, 2025

SUBJECT: Site Plan Review, St. Mary's Court, Somerset Well Drilling
28580 St. Mary's Court, Easton, MD 21601
Tax Map: 25, Parcels: 46, Lots 16 & 20

RE: January 2025 Review and Comments

Based on review of the above referenced site plan that has been completed by this office, the following comments are provided:

1. Sewage Disposal Areas (SDAs) should be abandoned prior to issuance of building permits that may infringe upon the SDAs. As per COMAR 26.04.02.04(E) any SDAs shall be "*...exclusive of easements, rights-of-way, buildings, and any other permanent or physical objects…*"
2. Abandonment of the on-site sewage disposal system (OSDS) on lot 16 should be accomplished by a licensed septic installer in Talbot County. A list of licensed septic installers can be found on our website here: https://talbothealth.org/environmental-health/septic-systems-sewage/
    a. Additionally, abandonment of the OSDS should only be performed under permit of a sanitary construction permit. Applications can be found on the website above and have no cost for the purposes of abandonment. Inspection should still be completed by a licensed environmental health specialist from this Office after the sanitary construction permit is issued.
3. The existing drinking water supply well should be abandoned by a licensed well driller. A copy of the abandonment report should be submitted to this Office for review.
4. A lot line revision for the removal of the lot line between lots 16 & 20, as well as the abandonment of the SDAs, should be submitted to this Office for review and comment. The cost of a minor line revision plat by this office is $100 at this time.

Please contact this office with any questions concerning the above referenced comments.

To: Samantha Smith <ssmith@eastonmd.gov>

Good Morning

I am (Assist Chief Daryl Caldwell) from the Easton Vol. Fire Department. We only have a few concerns about the project. The following concerns will be listed.

1.). Please make sure the Sprinkler system and please make sure the connection.

2.) Make sure it is MARKED and VISIBLE for the Sprinkler system.

3.) Make sure the electrical room is MARKED AND VISIBLE.

4.) Make sure the roads are wide enough for our fire apparatus.

5.) A sign that indicates NOT TO BLOCK THE SPRINKLER CONNETION.

Thank you

Assist Chief Daryl Caldwell
Easton Vol. Fire Department.

Hi Joe -

Thank you for providing information regarding the above-referenced site plan to our office for review. We note that this site was approved for growth allocation per the letter dated November 8, 2024 (attached). The applicant cannot receive a permit for the proposed project until all conditions of approval, as outlined in the attached letter, have been met.

In addition, we note that the project must meet all Critical Area requirements for development in the Intensely Developed Area (IDA), including the 10% Rule.

Please accept this email as our official review. Let me know if you have any questions.

Thank you!

STATE OF MARYLAND
CRITICAL AREA COMMISSION
CHESAPEAKE AND ATLANTIC COASTAL BAYS

November 8, 2024

Mr. Miguel Salinas
Town of Easton Planning and Zoning
14 South Harrison Street
Easton, MD 21601

Re: Cohee Growth Allocation
Town of Easton Ordinance No. 807
Talbot County Bill No. 1551 (Supplemental Growth Allocation)

Dear Mr. Salinas:

The purpose of this letter is to officially notify you of the Critical Area Commission's action on the above-referenced growth allocation, which is an amendment to the Town of Easton's Critical Area map. On November 6, 2024, the Critical Area Commission concurred with my determination that the growth allocation request could be reviewed as a refinement to the Town's Critical Area program. At that same meeting, I approved the growth allocation request to redesignate 8.348 acres of land from Resource Conservation Area (RCA) to Intensely Developed Area (IDA), as provided on the site plan and accompanying materials accepted by Commission staff on August 13, 2024, with the following conditions:

1. All areas of forest on Lots 16 and 20 shall be placed in a Forest Protection Area easement (excluding the existing Drainage Easement and Stormwater Management Easement).

2. The remaining areas of Buffer on Lot 16 shall be fully established in accordance with COMAR 27.01.09 and §28-401.4 of the Town of Easton's Zoning Code.

3. Within 120 days of Commission approval, the Town shall submit the following to Commission staff:
    a. A copy of the recorded line revision plat showing:
        i. The consolidation of Lots 20 and 16;
        ii. The new zoning designation of revised Lot 16; and
        iii. The revised Forest Protection Area encompassing all existing forest onsite (excluding the existing Drainage Easement and Stormwater Management Easement) and the area of Buffer establishment on Lot 16.
    b. A Buffer Management Plan in accordance with COMAR 27.01.09 showing full Buffer establishment on Lot 16 and its inclusion in the Forest Protection Area and a signed Planting Agreement Form.

c. A copy of all final reviews or authorizations regarding stormwater management, sediment and erosion control, and DNR Wildlife and Heritage Service (WHS).

Please note that the map designation change must be reflected on the Town's Critical Area map within 120 days of the completion of the above conditions. Once finalized, please forward an electronic file with the Town's updated Critical Area designation layer showing this parcel with the new Critical Area designation so that Commission staff can incorporate the change into the Critical Area map update layer.

On behalf of the Critical Area Commission and its staff, I would personally like to thank you for your help and cooperation throughout the growth allocation process. If you have any questions, you may contact Annie Sekerak at (410) 260-3466 or ann.sekerak@maryland.gov.

Sincerely,

Erik Fisher, AICP

February 4, 2025

Mr. Joeseph Mayer
Plan Reviewer
Town of Easton
14 South Harrison Street
Easton, MD 21601

Subject: 28580 Mary's Court – Somerset Well Drilling Co, Inc.
Lane Project No. 240060
Lane File No. A037

Dear Mr. Mayer,

The following is a point-by-point response to the comment letters dated January 22, 2025. On behalf of our client, we are pleased to provide the Town with our detailed responses to comments which correspond to our re-submission of revised site construction plans and other miscellaneous attachments.

For ease of reference, the Town's comments have been reiterated below with our detailed responses included in *italics*.

ENGINEERING DEPT COMMENTS:

1. POI#3 indicates an increase in runoff . Please revise.

The proposed grading has been modified to reduce the overall drainage area to POI #3, resulting in a decrease in post-development runoff for all storm events.

2. Provide Critical Area 10% Rule Calculations in the form of the State Spreadsheet for each of the 3 Drainage Areas. The RR Required and Provided should be added to the ESD SUMMARY CHART on Sheet 2 of 2.

The CAC spreadsheet is now included in the stormwater narrative. A digital copy is also included in the submittal package

PLANNING & ZONING DEPT COMMENTS:

1. Per Appendix B, Sketch Plan Submittal Checklist requires conceptual building elevations or renderings illustrating the character, scale, and materials of all proposed structures. Such elevations or renderings shall be sealed by a licensed professional as described above. Provide a color elevation for the exterior of the proposed buildings.

Building elevations illustrating character, scale and materials have been provided.

2. The ESDR Application indicates two three-sided pole buildings. The architectural plans depict a four-sided building with garage doors. Please revise.

Apologies. The building labels, project notes, and applications have all been updated to remove references to a 3-sided pole building.

3. Per Appendix B, Sketch Plan Submittal Checklist, show the location of the refuse collection for the proposed buildings.

A location for refuse collection for Buildings C and D is shown and labeled on the plans. Buildings A and B will utilize the existing refuse collection for the existing adjacent buildings.

4. Per Chapter 28-1007.3.A.6 of the Zoning Code, Include a statement regarding "the nature of the proposed use, its expected impact on its surrounding area, expected truck traffic, and any other information necessary to provide a fair and accurate assessment of the impacts of the proposed use on the subject property and the surrounding area".

Information regarding the nature of the proposed use for improvements in both phases was included in the 'Proposed Development' section of the Project Data. A statement regarding the impact on the surrounding areas and expected truck traffic resulting from Phase 1 has been added. A similar statement for the Phase 2 improvements will be provided at the time of development.

5. Show the truck loading space location and its dimensions on the sketch plan. Each loading space shall be not less than ten (10) feet in width and forty-five (45) feet in length, and shall have a minimum overhead clearance of fourteen (14) feet.

Truck loading space location is now shown and labeled.

6. Per item #8 on the Appendix B-1 Submittal Checklist and Chapter 28-901.3 A 1 of the Zoning Code, show the location of proposed fencing on the sketch plan. Indicate the type of fencing and its minimum height.

The fencing is now called out as being 8' tall vinyl on the plans.

7. Show all entrance and garage locations to proposed buildings on all plan views.

All doors and associated landing pads have been added to the plans.

8. Provide dimensions between the building units (existing, proposed & future) and property lines.

Dimensions from all buildings to the property lines have been added to a table within the project data on sheet 1.

9. Label all existing road paving widths on all plan views.

Existing road widths have been labeled on sheet 1 of 2.

10. Dimension the width of the proposed gravel pavement.

This dimension has been added.

11. Revise Development Data *Note on Existing Conditions Plan, sheet 1 of 2, to reference the Critical Area Commission's condition of obtaining approval within the 120 days of the Commission's approval dated November 6, 2024.

*The *Note has been updated to specify that the approval letter dictates that the map designation change must be reflected on the Town's critical area map within 120 days from the date of the letter.*

12. Revise Development Data Phasing Note on Existing Conditions Plan, sheet 1 of 2, elaborate more in detail if the drive aisles and parking facilities for future buildings 'C' and 'D' will be constructed during Phase 2.

The note has been revised to explain that Buildings C and D and their associated parking lots and stormwater facilities are to be constructed in a future second phase.

13. The Project Notes and Comprehensive Plan Design Principles Response Narrative have overlapping text on the Existing Conditions Plan, sheet 1 of 2. Revise text for legibility.

This has been corrected. Apologies.

14. Per Appendix B, Sketch Plan Submittal Checklist, general location and description (r.e. intended function, proposed species, etc.) of proposed landscaping. Describe the species for the proposed shrub hedge.

Potential Proposed Native Species have been added to the Landscape Legend in regard to the shrub hedge.

15. There are two designated existing parking facilities. The minimum number of accessible parking spaces must be determined separately for each parking facility. (§ 208.3 from the ADA Standards for Accessible Design). Show the existing parking spaces for the two parking facilities and provide the minimum number of accessible parking spaces (§ 208.2). Please revise all site plan views. In addition, will the required parking for proposed building 'A' and 'B' be utilized within the existing parking lots?

The required parking for buildings 'a' and 'b' will be utilized within the concrete pad in the existing storage yard and the proposed gravel parking. The required ADA space will be striped and signage provided on the concrete pad in the existing storage yard. Lane Engineering has field verified the slope compliance at the proposed location.

Existing ADA ramps are located at the entrances of both existing buildings, however, we are proposing new striping and signage to be installed as part of the Phae 1 construction. Lane Engineering has field verified the slope compliance at these locations.

16. Revise the Parking Required within the Development Data on the Existing Conditions Plan, sheet 1 of 2, to include the existing parking requirements.

Parking requirements for the existing buildings is now included in the Project Data.

17. Prior to Development Site Plan approval, verify and add slope information for all ADA spaces, ramps, access aisles and landing areas. Check all ADA related spot elevations and obtain approval from the Building Inspection Department.

Acknowledged. Detailed grading information for ADA spaces and ramps will be shown prior to Development Site Plan approval.

18. Prior to Development Site Plan approval, provide Van Accessible ADA Parking Sign Detail to include the sign "No Parking in Access Aisle" with an arrow pointing to the access aisle, place bollards at ADA aisles adjacent to the buildings with details and dimension between the bollards to verify ADA access.

Acknowledged. Details for ADA parking space signage will be shown prior to Development Site Plan approval.

BUILDING INSPECTION AND PERMIT DEPT COMMENTS:

1. Construction Documents (3 sets) for any new construction will be required. Documents must be prepared by a registered Maryland Registered Architect, with original plans signed and sealed. A code analysis completed by a Registered Maryland Architect including, classification (use group), construction type, and occupant loads must be completed and included with the application materials.

Acknowledged.

2. An appointment may be set up with this department to review your permit application materials prior to permit application submission.

Acknowledged.

EASTON UTILITIES COMMENTS:

1. Sheet 2 of 2: See electric comments.

A note to this effect will be included on detailed grading plan on the subsequent Site Construction Plans.

OFFICE OF ENVIRONMENTAL HEALTH COMMENTS:

1. Sewage disposal areas (SDA) should be abandoned prior to issuance of building permits that may infringe upon the SDAs. As per COMAR 26.04.02.04(E) any SDAs shall be "… exclusive of easements, right-of-ways, buildings, and any other permanent or physical objects…".

Understood. A line revision plat has been submitted to the Town and will call out the abandonment of the existing SDAs.

2. Abandonment of the on-site sewage disposal system (OSDS) on lot 16 should be accomplished by a licensed septic installer in Talbot County. A list of licensed septic installers can be found on our website here: https://talbothealth.org/environmental-health/septic-systems-sewage/
    a. Additionally, abandonment of the OSDS should only be performed under permit of a sanitary construction permit. Applications can be found on the website above and have no cost for the purposes of abandonment. Inspection should still be completed by a licensed environmental health specialist from this Office after the sanitary construction permit is issued.

The owner will be submitting the required application to the Health Department.

3. The existing drinking water supply well should be abandoned by a licensed well driller. A copy of the abandonment report should be submitted to this Office for review.

The owner wishes to retain the existing water supply well while also connecting the site to the available public water system, as the Health Department indicated in previous discussions that this would be possible.

4. A lot line revision for the removal of the lot lines between lots 16 & 20, as well as the abandonment of the SDAs, should be submitted to this office for review and comment. The cost of a minor line revision plat by this office is $100 at this time.

A copy of the line revision plat will be submitted to the Health Department under separate cover.

FIRE DEPARTMENT COMMENTS:

1. Please make sure the sprinkler system and please make sure the connection.

None of the existing buildings have a sprinkler system. Per the architect, a sprinkler system is not required for the Phase 1 pole buildings.

2. Make sure it is MARKED and VISIBLE for the sprinkler system.

See previous response.

3. Make sure the electrical room is MARKED and VISIBLE.

See previous response.

4. Make sure the roads are wide enough for our fire apparatus.

See previous response.

5. A sign that indicates NOT TO BLOCK THE SPRINKLER CONNECTION.
See previous response.

Should you have any questions, please feel free to contact me at (410) 822-8003.

Sincerely,
LANE ENGINEERING, LLC

STREAM	– 100'							

EXISTING CONDITIONS: DEVELOPED LOT CONTAINING A 12,150 SF OFFICE BUILDING WITH ASPHALT PARKING LOT AND A 4,600 SF OFFICE BUILDING WITH 8,010 SF OF SEMI–DETACHED WAREHOUSE STORAGE SPACE AND A 25,250 SF CONCRETE PAD FOR EQUIPMENT STORAGE.

PROPOSED DEVELOPMENT: (2) 9,750 SF POLE BUILDINGS (BUILDINGS 'A' AND 'B') FOR STORAGE AND ASSOCIATED GRAVEL ACCESS AND STORMWATER MANAGEMENT, THE ABANDONMENT OF TWO EXISTING SEWAGE RESERVE AREAS AND REMOVAL OF AN EXISTING SEPTIC SYSTEM TO BE REPLACED WITH A GRINDER PUMP AND FORCE MAIN TO SERVE EXISTING AND PROPOSED BUILDINGS. THE IMPROVEMENTS WILL NOT GENERATE ANY INCREASED TRUCK TRAFFIC TO OR FROM THE SITE AND IS NOT EXPECTED TO HAVE ANY IMPACT ON THE SURROUNDING AREA.
DEVELOPMENT OF TWO 8,000 SF SINGLE–STORY OFFICE BUILDINGS (BUILDINGS 'C' AND 'D') AND ASSOCIATED PARKING LOTS AND STORMWATER MANAGEMENT AREAS TO BE CONSTRUCTED IN A FUTURE SECOND PHASE.

MINIMUM LOT SIZE: 40,000 SF
MAXIMUM BUILDING HEIGHT: 35'
PROPOSED BUILDING HEIGHT: PROPOSED BUILDING NOT TO EXCEED 35'

TOTAL LOT COVERAGE PERMITTED: 50% (BUILDINGS & STRUCTURES ONLY)

*NOTE: EXISTING AND PROPOSED LOT COVERAGES LISTED BELOW WERE CALCULATED USING THE TOTAL COMBINED SITE AREA OF 13.999 AC±

TOTAL EXISTING LOT COVERAGE: 13.3%
TOTAL LOT COVERAGE: 50% PERMITTED (BUILDINGS & STRUCTURES ONLY)
PHASE 1 BUILDINGS (CONSTRUCTION RELATED BUSINESS):
STORAGE BUILDING A: 9,750 SF
STORAGE BUILDING B: 9,750 SF
PHASE 2 BUILDINGS (CONSTRUCTION RELATED BUSINESS):
1–STORY OFFICE BUILDING C: 8,000 SF
1–STORY OFFICE BUILDING D: 8,000 SF
TOTAL BUILDING: 35,500 SF PROPOSED (5.84%)

PHASING NOTE: ALL IMPROVEMENTS AS SHOWN HEREON SHALL BE COMPLETED IN PHASE 1 WITH THE EXCEPTION OF FUTURE BUILDINGS C & D WHICH SHALL BE CONSTRUCTED IN PHASE 2.

PARKING REQUIRED:
EXISTING BUILDINGS
OFFICE – OFFICE OR BANK WITHOUT DRIVE THRU @ 1/250 GFA: 12,150 SF/250 = 49 SPACES MINIMUM
1 BIKE SPACE PER 10 VEHICLE SPACES: 49/10 = 5 BIKE SPACES MINIMUM
OFFICE OR BANK WITHOUT DRIVE THRU @ 1/140 GFA: 12,150 SF/140 = 87 SPACES MAXIMUM
1 BIKE SPACE PER 10 VEHICLE SPACES: 87/10 = 9 BIKE SPACES MAXIMUM
CONSTRUCTION OFFICE – CONSTRUCTION RELATED BUSINESS @ 1/1000 GFA: 4,600 SF/1000 = 5 SPACES MINIMUM
CONSTRUCTION RELATED BUSINESS @ 1/200 GFA: 4,600 SF/200 = 23 SPACES MAXIMUM

WAREHOUSE – CONSTRUCTION RELATED BUSINESS @ 1/1000 GFA: 8,010 SF/1000 = 8 SPACES MINIMUM
CONSTRUCTION RELATED BUSINESS @ 1/200 GFA: 8,010 SF/200 = 40 SPACES MAXIMUM

PROPOSED BUILDINGS
A & B – CONSTRUCTION RELATED BUSINESS @ 1/1000 GFA: 18,000 SF/1000 = 18 SPACES MINIMUM (INCL 1 ADA SPACE)
CONSTRUCTION RELATED BUSINESS @ 1/200 GFA: 18,000 SF/200 = 90 SPACES MAXIMUM (INCL 4 ADA SPACES)

FUTURE BUILDINGS
C & D – CONSTRUCTION RELATED BUSINESS @ 1/1000 GFA: 16,000 SF/1000 = 16 SPACES MINIMUM (INCL 1 ADA SPACE)
CONSTRUCTION RELATED BUSINESS @ 1/200 GFA: 16,000 SF/200 = 80 SPACES MAXIMUM (INCL 4 ADA SPACES)
TOTAL SPACES REQUIRED = 34 SPACES (MINIMUM)

PARKING PROVIDED:
EXISTING BUILDINGS
62 EXISTING SPACES, INCLUDING 3 ADA SPACES (NOTE–SLOPE COMPLIANCE OF EXISTING ADA SPACES HAS BEEN FIELD VERIFIED BY LANE ENGINEERING)
5 BIKE SPACES (BIKE RACK TO BE INSTALLED AS PART OF PHASE 1 CONSTRUCTION)

PROPOSED BUILDINGS
18 PROPOSED SPACES PROVIDED, INCLUDING 1 VAN ACCESSIBLE ADA SPACE

FUTURE BUILDINGS
64 PROPOSED SPACES PROVIDED, INCLUDING 2 ADA SPACES AND 2 VAN ACCESSIBLE ADA SPACES

STORMWATER MANAGEMENT: QUANTITY MANAGEMENT IS ADDRESSED BY AN EXISTING REGIONAL STORMWATER FACILITY. STORMWATER QUALITY MANAGEMENT WILL BE ADDRESSED THROUGH ESD FEATURES AS REQUIRED AND SHOWN HEREON APPROXIMATELY.

FOREST CONSERVATION: PREVIOUSLY SATISFIED UNDER ORIGINAL SUBDIVISION APPROVAL (PLAT PC 4/35G)

LIGHTING: ALL LIGHTING WILL BE SCREENED FROM VIEW OR DIRECTED DOWNWARD AND SHIELDED, AT A MAXIMUM HEIGHT OF 18', AND NOT EXCEED LEVELS GREATER THAN 1–FOOT CANDLE AT PROPERTY LINES

SIGNAGE: EXISTING SIGN TO BE UTILIZED, NO NEW SIGNAGE PROPOSED WITH THIS DEVELOPMENT.

REFUSE/TRASH: BUILDINGS 'A' AND 'B' WILL UTILIZE THE DUMPSTER ALREADY IN PLACE FOR THE EXISTING STORAGE YARD. A PROPOSED DUMPSTER LOCATION FOR BUILDINGS 'C' AND 'D' IS SHOWN.

PROJECT NOTES

1. PROPERTY BOUNDARY AND EXISTING CONDITIONS SURVEYED BY LANE ENGINEERING, LLC ON AUGUST 2023.
2. SITE TOPOGRAPHY AS SHOWN HEREIN WAS DERIVED FROM A FIELD SURVEY BY LANE ENGINEERING, LLC DATED AUGUST 2023.
3. THE ELEVATIONS SHOWN HEREON ARE NAVD 1988 DATUM.
4. THE COORDINATES SHOWN HEREON ARE BASED ON THE MARYLAND STATE PLANE COORDINATE SYSTEM NAD83 (2011).
5. THE SITE IS LOCATED PARTIALLY WITHIN OF THE CHESAPEAKE BAY CRITICAL AREA.
6. THERE ARE NO KNOWN HISTORIC STRUCTURES OR ARCHEOLOGICALLY SIGNIFICANT RESOURCES, STREAMS, TIDAL WETLANDS/NON–TIDAL WETLANDS OR KNOWN HABITAT PROTECTION AREAS IN PROXIMITY TO THE PROPOSED SITE IMPROVEMENTS.
7. PUBLIC WATER AND SEWER SERVICES ARE PROVIDED BY THE TOWN OF EASTON.
8. FAA DETERMINATION OF NO HAZARD TO AIR NAVIGATION SHALL BE REQUIRED.

COMPREHENSIVE PLAN DESIGN PRINCIPLES RESPONSE NARRATIVE

PRINCIPLE #1– INTEGRATED USES ARE DESIRABLE– THIS DEVELOPMENT PROPOSAL PROVIDES ADDITIONAL STORAGE SPACE FOR EXISTING BUSINESSES IN THIS MIXED BUSINESS PARK

PRINCIPLE #2– NATURAL FEATURES SHOULD DETERMINE DESIGN– NO COMPELLING NATURAL FEATURES; PROPOSED IMPROVEMENTS ARE CONFIGURED TO CREATE COHESIVE SITE LAYOUT UPON COMPLETION AND TAKE ADVANTAGE OF NATURAL DRAINAGE PATTERNS

PRINCIPLE #3– AUTOMOBILES SHOULD NOT DETERMINE DESIGN– PARKING FOR OFFICE USERS AND CUSTOMERS PROVIDED FOR CONVENIENCE WITH BULK OF PARKING TO FRONT OR REAR OF BUILDING

PRINCIPLE #4– AMPLE COMMUNITY OPEN SPACE– USABLE OPEN SPACE IS NOT APPLICABLE TO THIS PROJECT

PRINCIPLE #5– ARCHITECTURE SHOULD RESPECT EASTON'S HISTORICAL DEVELOPMENT– PROPOSED ARCHITECTURE MATCHES EXISTING BUILDINGS IN DESIGN AND IS COMPATIBLE WITH THE COMMERCE PARK'S ARCHITECTURAL PALETTE

PRINCIPLE #6– SIGNS SHOULD INFORM BUT NOT DOMINATE– NO NEW SIGNAGE IS PROPOSED

PRINCIPLE #7– NEIGHBORHOODS SHOULD CONTAIN A DIVERSITY OF HOUSING TYPES– NOT APPLICABLE TO THIS PROJECT

PRINCIPLE #8 RESIDENTIAL NEIGHBORHOODS SHOULD BE INTERESTING PLACES– NOT APPLICABLE TO THIS PROJECT

PRINCIPLE #9– NEIGHBORHOODS SHOULD CONNECT– NOT APPLICABLE TO THIS PROJECT

EXIT ACCESS CORRIDORS – CLASS C
ROOMS AND ENCLOSED SPACES – CLASS C
2. FLOOR FINISH – CLASS II
3. DECORATIONS AND TRIM – FLAME RESISTANT

F. MEANS OF EGRESS
1. OCCUPANT LOAD –
WAREHOUSE –
500 SQUARE FEET PER OCCUPANT = 20 PEOPLE
2. EGRESS WIDTH –
STAIRWAYS – .3" PER OCCUPANT
OTHER EGRESS COMPONENTS – ,2" PER OCCUPANT
3. ACCESSIBLE MEANS OF EGRESS –
TWO REQUIRED
TWO PROVIDED
4. SPACES WITH ONE MEANS OF EGRESS –
MAXIMUM OCCUPANT LOAD – 50
MAXIMUM TRAVEL DISTANT – 75'
5. LENGTH OF EXIT ACCESS TRAVEL –
200 FEET MAXIMUM ALLOWED
50 FEET MAXIMUM PROVIDED
6. SIZE OF DOORS – 32 " MINIMUM
EGRESS WIDTH PER OCCUPANT = .2"/PERSON, 34 X .2" =
170 PEOPLE PER DOOR
7. PANIC HARDWARE – NOT REQUIRED
8. LIGHTED EXIT SIGNS REQUIRED

II. NFPA 101 – 2021
A. CLASSIFICATION OF OCCUPANCY –
STORAGE

B. CLASSIFICATION OF HAZARD OF CONTENTS – ORDINARY HAZARD

C. MINIMUM CONSTRUCTION REQUIREMENTS – NO REQUIREMENT

D. OCCUPANT LOAD – 20 PEOPLE

E. MEANS OF EGRESS –
1. ALL EXITS LOCATED AT LEVEL OF EXIT DISCHARGE
2. TWO EXITS REQUIRED
2. DOORS
a. 32" MINIMUM CLEAR WIDTH
b. MAXIMUM FLOOR VARIATION BOTH SIDES OF DOOR – 1/2"
c. SWING IN DIRECTION OF EGRESS TRAVEL
3. PANIC HARDWARE AT EXIT DOORS FROM BUILDING NOT REQUIRED
4. TRAVEL DISTANCE TO EXITS – 150 FEET MAXIMUM
5. EMERGENCY LIGHTS AND LIGHTED EXIT SIGNS

F. PROTECTION –
1. INTERIOR WALL AND CEILING CLASS A, CLASS B OR CLASS C
2. SMOKE DETECTORS AND FIRE ALARM SYSTEM NOT REQUIRED

IV. ADA

A. ACCESSIBLE SITES –
1. AT LEAST ONE ACCESSIBLE ROUTE PROVIDED
2. ACCESSIBLE PARKING SPACES – EXISTING
B. ACCESSIBLE BUILDING –
1. ONE ACCESSIBLE ROUTE TO ACCESSIBLE SPACES PROVIDED
2. FLOOR SURFACES TO BE SLIP RESISTANT
a. CARPET IF PROVIDED – LEVEL LOOP, GLUED INSTALLATION
3. STAIRS – NOT APPLICABLE
4. DOORS –
a. CLEAR WIDTH – 32" MINIMUM PROVIDED
b. MANEUVERING CLEARANCES – PROVIDED
c. THRESHOLDS – 1\2" MAXIMUM HEIGHT PROVIDED
d. HARDWARE – LEVER TYPE HARDWARE TO BE PROVIDED
e. 50% OF ENTRANCES MUST BE ACCESSIBLE – 100% PROVIDED
5. DRINKING FOUNTAINS – NOT REQUIRED
6. TOILET FACILITIES – NOT REQUIRED

NOTES:

1. ALL DOORS TO BE EQUIPPED WITH LEVER TYPE LOCK AND LATCHSETS. UNLESS NOTED OTHERWISE

FOUNDATIONS

1. PRESUMPTIVE BEARING CAPACITY: 2000 PSF

2. FOUNDATION DESIGN IS BASED ON SHALLOW SPREAD FOOTINGS BEARING ON SUITABLE NATURAL SOILS AND/OR NEW COMPACTED STRUCTURAL FILL.

3. ALL ORGANIC MATERIALS EXCESSIVELY SOFT OR LOOSE SOILS, TREES, ASPHALT, CONCRETE, DEBRIS AND OTHER DELETERIOUS MATERIALS SHALL BE REMOVED. UNSUITABLE AREAS SHALL BE REMOVED AND REPLACED.

4. AREAS REQUIRING UNDERCUT AND FILL MATERIAL DUE TO THE PRESENCE OF UNSUITABLE MATERIAL SHALL BE BACKFILLED TO THE DESIGN FOOTING SUBGRADE WITH NEW COMPACTED STRUCTURAL FILL.

5. COMPACTED STRUCTURAL FILL FOR BUILDING SUPPORT UTILIZING MATERIAL APPROVED FOR USE INCLUDE:

ON-SITE GRANULAR SOILS INCLUDING GM , GP, GM, SM, SP, ND. SM, CLASSIFIED IN ACCORDANCE WITH THE UNIFIED SOLID CLASSIFICATION SYSTEM (USCS). FURTHERMORE, THE MATERIAL TO BE UTILIZED AS STRUCTURAL FILL SHOULD HAVE A PLASTICITY INDEX (PI) LESS THAN 20.

6. COMPACTED STRUCTURAL FILL BENEATH ALL FOUNDATIONS, SLABS ON GRADE AND ADJACENT TO FOUNDATION WALLS SHALL BE PLACED IN LIFTS NOT EXCEEDING 8 INCHES IN LOOSE THICKNESS AND BE COMPACTED TO 95 PERCENT OF MAXIMUM DRY DENSITY PER ASTM D-1557 MODIFIED PROCTOR TEST.

7. SOILS EXPOSED AT THE BASES OF ALL FOUNDATION EXCAVATIONS SHOULD BE PROTECTED AGAINST ANY DETRIMENTAL CHANGE IN CONDITION, SUCH AS DISTURBANCE FROM RAIN OR FROST. SURFACE RUNOFF SHOULD BE DRAINED AWAY FROM THE EXCAVATIONS AND NOT BE ALLOWED TO POND. FOUNDATION EXCAVATIONS SHOULD BE PROTECTED FROM RAINFALL OR FREEZING CONDITIONS. SLOPE FOOTINGS EXCAVATIONS AS REQUIRED FOR STABILITY AND SAFTY OR PROVIDED SHEETING OR SHORING IN ACCORDANCE WITH OSHA REQUIREMENTS IN THE EVENT THAT THE CONTRACTOR DETERMINES THAT SHEETING OR SHORING IS REQUIRED FOR ESCALATION. THE CONTRACTOR SHALL RETAIN THE SERVICES OF A REGISTERED PROFESSIONAL STRUCTURAL ENGINEER FOR DESIGN AND DOCUMENTATION OF ALL SHEETING AND SHORING REQUIRED FOR THE WORK.

8. UTILITY LINES SHALL NOT PASS UNDER FOOTINGS, STEP FOOTINGS BELOW UTILITY LINES AND SLEEVE WALL.

9. TRENCHES WHICH RUN ADJACENT TO FOOTINGS AND ARE LOWER THAN THE FOOTING BOTTOM AND ARE WITHIN A HORIZONTAL DISTANCE OF 1.5 TIMES THE ELEVATION DIFFERENCE SHALL BE BACKFILLED WITH 1500 PSI CONCRETE TO THE FOOTING BOTTOM.

CONCRETE

1. ALL CONCRETE WORK SHALL CONFORM TO ACI 318 (LATEST EDITION).

2. CONCRETE COMPRESSIVE STRENGTH AT 28 DAYS SHALL BE:

FOUNDATION: 3500 PSI
FLOOR SLABS: 3500 PSI
EXTERIOR WALKS, STEPS, PADS,
RAMPS AND CURBS: 3500 PSI
ALL EXTERIOR CONCRETE SHALL BE AIR-ENTRAINED (6+/-1)%.

3. CONCRETE SHALL NOT BE PLACED IN WATER OR ON FROZEN GROUND.

4. CALCIUM CHLORIDE ADMIXTURES ARE PROHIBITED, USE OF ADMIXTURES SHALL BE SUBJECT TO APPROVAL BY THE ARCHITECT.

GENERAL NOTES

1. EXTERIOR WALLS SHALL BE 2x4 WOOD GIRTS @ 2'-0" O.C. HORIZ. W/ 29 GAUGE GALVALUM PAINTED METAL PANELS.

2. ALL DIMENSIONS ARE TO FACE AND/OR CENTER OF STRUCTURE.

3. 12" OVERHANG EAVES AND GABLES.

4. EXTERIOR FIBERGLASS SMOOTH SKIN PLASTPRO 2000 INSULATED 9 LITE ENTRANCE DOOR AND PLASTPRO PF JAMB W/ LEVER TYPE LOCKSET, ANSI F109.

SYMBOLS

Table of Contents

Appendices

Introduction

This report addresses the impacts of stormwater runoff as a result of the proposed improvements on Lots 16 and 20 of the Talbot Commerce Park, located in Easton, MD. The stormwater management plan incorporates the requirements of the 2000 Maryland Stormwater Design Manual Volumes I and II (Manual) as currently updated. This report addresses stormwater requirements and meets the intent of the guidelines and methodologies presented in the MDE document Environmental Site Design (ESD) Process & Computations dated July 2010.

General Site Information

This project is located on Parcel 46, Lots 16 and 20, on Marys Court. The parcel is within Tax Map 25 and is zoned BC – Business Commercial with a combined site area of 13.99 acres± and a Limits of Disturbance (LOD) for all phases of proposed development of 3.39 acres±. The project site is located partially inside the Chesapeake Bay Critical Area.

Figure 1: Aerial View of Site

Existing Conditions

Lots 16 and 20 are both currently developed lots within the Talbot Commerce Park. The central portion of Lot 16 contains a 4,600 square foot office building with approximately 8,010 sf of semi-detached warehouse storage space and a 25,250 concrete pad for equipment storage, as well as a 12,150 sf office building with an asphalt parking lot in the southwest corner of the lot. An existing sewage reserve area, that serves all existing buildings, is located to the north of the equipment storage pad. An existing regional stormwater management pond is located within an easement on the central portion of Lot 20, to the west of the existing office building. To the south of the stormwater pond, the lot is undeveloped. To the north of the pond, the lot is undeveloped save for a small shed on a concrete pad (approximately 800 sf) which is located on an unused sewage disposal area. Lot 20 currently has no vehicular access points from Mary's Court.

It is proposed that both sewage reserve areas on each lot be abandoned. A new grinder pump and force main system is proposed to be installed on Lot 16 to serve both the existing buildings and any future buildings, and will tie to the public sewer system located in Mary's Court. Water is served by a well located on Lot 16.

The entirety of Lot 20 and part of Lot 16 are inside the IDA Critical Area zone. Both lots are subject to stream buffers and an existing forest conservation area on their northern boundaries.

The existing building and equipment pad on Lot 16 act as a high point, directing drainage to the forest conservation area to the north and east before entering Glebe Creek, and to a drainage ditch to the west, which then enters a closed storm drain system direct to the regional stormwater pond on Lot 20. An existing high point is located generally in the east-central portion of the development area on Lot 20, directing drainage via overland flow to the regional stormwater pond to the southwest and the forest conservation area and Glee Creek to the north.

Within the proposed development area are Hydrologic Group C/D soils, per published soil maps for Talbot County.

Symbol	***Soils Name***	***Soil Group***
CsA	Crosiadore Silt Loam	C/D
MtA	Mattapex Silt Loam	C
MtB	Mattapex Silt Loam	C
WoA	Woodstown Loam	C
WoB	Woodstown Loam	C
Zk	Zekiah	C/D

Proposed Project

Of the approximately 13.99 acre site, roughly 3.39 acres is proposed to be developed. For development in the immediate future- two enclosed pole buildings for storage and an associated gravel access drive and parking pad, the removal of an existing septic system to be replaced with a grinder pump and force main, and the abandonment of two existing sewage reserve areas. There is a possibility for additional developments, two single story office buildings with associated parking lots and an access drive providing connection to the existing parking lots on Lot 16, on Lot 20 at some point in the future. Sewer stubs will be installed as part of the current construction to serve the future buildings.

The site LOD encompasses the demolition of existing site features, all proposed construction, including the possible future improvements, and landscaping. Refer to the Site Construction Plans for additional detailed information.

Stormwater Management

The overall project layout includes two submerged gravel wetlands, one located on the northern side of lots 16 and 20, bordering the existing forest conservation area, and one on Lot 20 to the west of the proposed future improvements, to capture runoff for water quality treatment and to provide quantity management. A network of open and closed storm drain systems and overland sheet flow will direct runoff to these facilities. A small portion of the future access road will drain into the existing regional stormwater pond, located in an easement on Lot 20.

The stormwater management quantity and quality computations are based on the overall proposed limits of disturbance (LOD) area, the proposed impervious areas within it, and the soil types present on site, as required.

Stormwater Quantity Management

There are 3 locations where runoff generally exits the site as it exists currently, identified on the drainage area maps as "points of interest" or POI's, which were used to evaluate the effects on downstream/offsite drainage patterns based on the changes that will occur as part of the proposed construction. Each POI was analyzed for the 2-, 10-, and 100-year storm events per the Delmarva Hydrograph, in both existing and proposed conditions.

The site was analyzed using HydroCAD software, with the following results:

POI	***Peak Runoff (cfs)***					
	2-year		***10-year***		***100-year***	
	Pre	***Post***	***Pre***	***Post***	***Pre***	***Post***
1	2.22	0.00	4.69	0.92	7.86	5.76
2	0.45	0.00	0.95	0.11	1.60	2.17
3	0.36	0.32	0.76	0.62	1.27	1.00
Total Runoff Leaving Site	**2.94**	**0.32**	**6.22**	**1.65**	**10.44**	**8.93**

As seen above, the peak runoff exiting the project site will be reduced under proposed conditions for all storm events, and flow velocities for all POIs during all storm events are non-erosive.

Please see Appendix A for quantity management calculations. Please see Appendix c for drainage area maps.

Stormwater Quality Management

A target Environmental Site Design Volume (ESDv) of 14,560 cf was computed based on the project's LOD, which covers approximately 3.39 acres and includes the future Phase 2 improvements. Approximately 60% of the LOD will be an impervious ground cover.

ESD Practices Evaluation

Alternative Surfaces

- Green Rooftops – Not economical for Industrial usage
- Permeable Pavements – Permeable pavements require significant maintenance and are not desirable for commercial applications or areas of repeated heavy equipment loading.
- Reinforced Turf - Reinforced turf areas are commonly used for emergency equipment access or for areas that receive minimal vehicular use. Reinforced turf is not desirable for commercial applications.

Nonstructural practices

- Disconnection of Rooftop Runoff – Insufficient greenspace onsite to meet the required design criterion.
- Disconnection of Non-Rooftop Runoff – Insufficient greenspace onsite to meet the required design criterion.

- Sheetflow to Conservation Area – The configuration of the improvements do not allow for sheetflow discharge to site adjacent forest conservation areas.

Micro-scale practices

- Rainwater Harvesting – Opportunities for on-site reuse of harvested rainwater is limited. Irrigation is not proposed for the site. Operations and maintenance, especially during cold-weather periods, is also a concern.
- **Submerged Gravel Wetlands** – This practice is best suited for sites with a high groundwater table and poor soils. Mapped soils are predominantly C/D soils and ponds of significant excavation are likely to intercept groundwater if placed on the lower elevation portion of the site.
- Landscape Infiltration – It is assumed there is not a significant infiltration potential within the project LOD without additional geotechnical exploration.
- Infiltration Berms – The requirements of the proposed development do not leave enough room for the implementation of this practice.
- Dry Wells – This practice is viewed as undesirable in Talbot County where many sites frequently have seasonal high ground water and other maintenance concerns. Dry wells are typically reserved for the treatment of building rooftops and would therefore require additional practices to supplement.
- Micro-Bioretention – This practice will provide significant treatment. Maintenance for this practice is reasonable.
- Rain Gardens – This practice is better suited for residential environments.
- Swales – This practice provides the required treatment, is relatively easy to construct and maintain, and will enhance existing site drainage patterns.

Due to the poor in-situ soils, as mapped and observed by field inspection, it appears that Submerged Gravel Wetland represents the most economical form of quality treatment. Gravel wetlands are ideal for large drainage areas that generate significant runoff as they need to maintain a saturated media.

Submerged Gravel Wetlands are proposed to address the ESDv requirement. The total ESDv provided by ponding storage from these practices is 15,258 cf. Refer to Appendix B for calculations. It is proposed that SGW 1 be constructed intially at a size that would satisfy the ESDv requirement for the current development, and later expanded to satisfy the additional ESDv required for the future development.

Conclusion

This stormwater management analysis indicates that the proposed design will successfully meet stormwater quality requirements with quantity management being previously satisfied at the time of the industrial park subdivision.

APPENDIX B

ESD CALCULATIONS

Project: Somerset Well
Location: 28580 Marys Ct, Easton, MD
Job No.: 240060 Designed By: BMW
File No.: A037 Date: 2/4/2025

Lane Engineering, LLC

DESIGN PHASE: CONCEPT PRELIMINARY FINAL

MARYLAND ENVIRONMENTAL SITE DESIGN (ESD) CALCULATIONS

Site Data

Total Disturbance Area (A) = 147,534 sf
Proposed Impervious Area (A_i) = 88,872 sf → Percent Impervious (I) = 60 %

Site Soils				
HSG	A	B	C	D
Area (sf)			147,534	
% of Area	0%	0%	100%	0%

INPUT
CONSTANT
CALCULATED

Determine RCN for Woods in Good Condition

HSG	A	B	C	D
Area (sf)	-	-	147,534	-
% of Area	0%	0%	100%	0%
RCN	38	55	70	77

Weighted RCN= **70**

Determine Target ESD $_v$ for Entire Site

Volumetric Runoff Coefficient (R_v) = 0.59 $R_v = 0.05 + 0.009\,(I)$
Percent Impervious (I) = 60 % → use 60 % (from Table 5.3)

HSG	A	B	C	D
Area (sf)	-	-	147,534	-
Target P_E (in)	2.0	2.0	2.0	1.8

Composite Target P_E= **2.0** in

Target ESDv = 14,560 cf $ESD_v = [(P_E)(A)(R_v)]/12$

M-2: SUBMERGED GRAVEL WETLAND DESIGN CALCULATIONS

SWM Feature No. 1

Contributing Drainage Area Data

Total Contributing Area (A) =	100,253	sf		INPUT
Contributing Impervious Area (A_i) =	63,802	sf		CONSTANT
Percent Impervious (I) =	64	%		CALCULATED
Volumetric Runoff Coefficient (R_v) =	0.62		$R_v = 0.05 + 0.009\,(I)$	
Target P_E =	2	in		
Target ESD_v =	10,406	cf	$ESD_v = [(P_E)(A)(R_v)]/12$	

Determine Limiting Storage Volume

The maximum treatment volume that can be credited to this practice is limited to the lesser of the amount of: a) runoff from the 1-year 24-hour storm (the Cpv storm=3.0 in) draining to it, or b) the computed ESDv provided.

1-yr, 24-hr ESDV= 15,609 cf $Limiting\ ESD_v = [(3.0)(A)(R_v)]/12$

Determine Storage Volume Provided

Temporary ponding depth =	1	ft	
Provided ESD_v =	10,651	cf	$Provided\ ESD_v = Ponding\ storage\ volume\ as\ determined\ by\ HydroCAD\ model$

The volume of runoff treated by this feature is 10,651 cf

SWM Feature No. 2

Contributing Drainage Area Data

Total Contributing Area (A) =	37,512	sf		INPUT
Contributing Impervious Area (A_i) =	18,393	sf		CONSTANT
Percent Impervious (I) =	49	%		CALCULATED
Volumetric Runoff Coefficient (R_v) =	0.49		$R_v = 0.05 + 0.009\,(I)$	
Target P_E =	1.8	in		
Target ESD_v =	2,764	cf	$ESD_v = [(P_E)(A)(R_v)]/12$	

Determine Limiting Storage Volume

The maximum treatment volume that can be credited to this practice is limited to the lesser of the amount of: a) runoff from the 1-year 24-hour storm (the Cpv storm=3.0 in) draining to it, or b) the computed ESDv provided.

1-yr, 24-hr ESDV= 4,607 cf $Limiting\ ESD_v = [(3.0)(A)(R_v)]/12$

Determine Storage Volume Provided

Temporary ponding depth =	1	ft	
Provided ESD_v =	4,832	cf	$Provided\ ESD_v = Ponding\ storage\ volume\ as\ determined\ by\ HydroCAD\ model$

The volume of runoff treated by this feature is 4,607 cf

WARNING!!
THE LOCATIONS OF EXISTING UTILITIES AS SHOWN ON THIS PLAN ARE APPROXIMATE ONLY. THE CONTRACTOR SHALL VERIFY THE LOCATION AND DEPTH OF EXISTING UTILITIES PRIOR TO BEGINNING CONSTRUCTION. THE QUANTITIES SHOWN ON THIS PLAN ARE FOR INFORMATIONAL AND PERMITTING PURPOSES ONLY. THE CONTRACTOR SHALL VERIFY ALL QUANTITIES TO HIS OWN SATISFACTION PRIOR TO BEGINNING CONSTRUCTION.

THE CONTRACTOR SHALL TEST PIT AND LOCATE EXISTING UNDERGROUND UTILITIES PRIOR TO THE BEGINNING OF ANY WORK ON-SITE. THE CONTRACTOR SHALL NOTIFY DEPT. OF PUBLIC WORKS OF ANY POSSIBLE CONFLICT AND REQUEST THE RELOCATION OF THE EXISTING UNDERGROUND UTILITIES BEFORE BEGINNING ANY WORK ON-SITE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY RELOCATION EXPENSE.

APPENDIX D

CRITICAL AREA COMMISSION 10% SPREADSHEET

Maryland ESD Calculations and 10% Phosphorus Removal

Last Update: 12/5/2016

Project Name:	**Somereset Well Drilling Co, 28530 Marys Ct, Easton, MD**
Date:	**22-Jan-25**
	data input cells
	calculation cells

Step 1: Complete ESD Implementation Checklist

Check all of the Following ESD Practices That Were Implemented at Site	*Yes - No - N/A*
Environmental Mapping Was Conducted at Site Prior to Layout	*YES*
Natural Areas Were Conserved (e.g., forests, wetlands, steep slopes, floodplains)	*YES*
Stream, Wetland and Shoreline Buffers Were Reserved	*YES*
Disturbance of Permeable Soils Was Minimized	*YES*
Natural Flow Paths Were Maintained Across the Site	*YES*
Building Layout Was Fingerprinted to Reduce Clearing and Grading at Site	*YES*
Site Grading Promoted Sheetflow From Impervious Areas to Pervious Ones	*YES*
Site Design Was Evaluated to Reduce Creation of Needless Impervious Cover	*YES*
Site Design Was Evaluated to Maximize Disconnection of Impervious Cover	*YES*
Site Design Was Evaluated to Identify Potential Hotspot Generating Area for Stormwater Treatment	*YES*
Erosion and Sediment Control Practices and Post Construction Stormwater Management Practices Were Integrated into a Comprehensive Plan	*YES*
Tree PlantingWas Used at the Site to Convert Turf Areas into Forest	*NO*

Step 2: Calculate Site Imperviousness and Water Quality Volume, WQv (for redevelopment)

Site Area, A (acres)	3.39
Existing Impervious Surface Area (acres)	0.05
Proposed Impervious Surface Area (acres)	1.96
Rainfall Depth, P (in)	1.0
Existing Imperviousness, I_{pre}	1.4%
Proposed Imperviousness, I_{post}	57.8%
Water Quality Calculation for Redevelopment Only	
Required Treatment Area (acres)	0.00
Runoff Coefficient, Rv	0.95
Water Quality Volume, WQv (cf)	**0**

Step 3: Calculate Phosphorous Removal Requirement, RR for Critical Area Sites

Development Category (for 10%)	**New Development**
New Development	
Average Annual Predevelopment Load, Lpre (lbs P / yr)	1.69
Redevelopment:	
Predevelopment Runoff Coefficient, Rv_{pre}	0.06
Phosphorous Mean Concentration, C (mg/L)	0.3
Average Annual Predevelopment Load, L_{pre} (lbs P / yr)	0.52
Post-Development Runoff Coefficient, Rv_{post}	0.57
Average Annual Post-Development Load, L_{post} (lbs P / yr)	4.73
Removal Requirement, RR (lbs P / yr)	**3.20**

Step 4: Calculate Environmental Site Design (ESD) Rainfall Target, P_E

Development Category (for ESD)	**New Development**
% Soil Type A	0%
% Soil Type B	0%
% Soil Type C	100%
% Soil Type D	0%
Pre-Developed Condition, RCN_{woods}	70
Soil Type A ESD Rainfall Target, P_E (in)	0.00
Soil Type B ESD Rainfall Target, P_E (in)	0.00
Soil Type C ESD Rainfall Target, P_E (in)	2.00
Soil Type D ESD Rainfall Target, P_E (in)	0.00
Maximum P_E (in)	2.7
Site ESD Rainfall Target, P_E (in)	2.00
ESD Runoff Depth, Q_E (in)	1.14
ESD Runoff Volume, ESDv (cf)	**14,022**
Total Treatment Volume (cf)	**14,022**

Step 5: Select Nonstructural Practices to Treat the ESD Rainfall Target

Nonstructural Practices	P_E Credit Description	Contributing Drainage Area (sf)	Direct WQv or ESDv Received by Practice (cf)	WQv or ESDv from Up-Gradient Practices (cf)	P_E Credit (in)	WQV or ESDv credit (cf)	Runoff Volume Remaining (cf)	Baseline Phosphorous Removal Efficiency	*Critical Area Credits* Average Adjusted Removal Efficiency Rate	P Load to Practice (lbs/yr)	Load Reduction (lbs/yr)	Remaining Load (lbs/yr)
Disconnection of Rooftop Runoff (A/B Soils)	Up to 1 inch credit provided based upon disconnection flow length.	0	0	0	#DIV/0!	0	0	50%	0%	0.00	0.00	0.00
Disconnection of Rooftop Runoff (C/D Soils)	Up to 1 inch credit provided based upon disconnection flow length.	0	0	0	#DIV/0!	0	0	25%	0%	0.00	0.00	0.00
Disconnection of Non-Rooftop Runoff (A/B Soils)	Up to 1 inch credit provided based upon disconnection and contributing flow lengths.	0	0	0	#DIV/0!	0	0	50%	0%	0.00	0.00	0.00
Disconnection of Non-Rooftop Runoff (C/D Soils)	disconnection and contributing flow lengths.	0	0	0	#DIV/0!	0	0	25%	0%	0.00	0.00	0.00
Sheetflow to Conservation Areas (A/B Soils)	Up to 1 inch credit provided based upon conservation area width.	0	0	0	0	0	0	50%	0%	0.00	0.00	0.00
Sheetflow to Conservation Areas (C/D Soils)	Up to 1 inch credit provided based upon conservation area width.	0	0	0	0	0	0	25%	0%	0.00	0.00	0.00

Step 6: Select Micro-Scale Practices to Treat the ESD Rainfall Target

Micro-Scale Practices	P_E Credit Description	Contributing Drainage Area (sf)	Direct ESDv Received by Practice (cf)	WQv or ESDv from Up-Gradient Practices (cf)	WQv or ESDv credit (cf)	Runoff Volume Remaining (cf)	Baseline Phosphorous Removal Efficiency	Average Adjusted Removal Efficiency Rate	P Load to Practice (lbs/yr)	Load Reduction (lbs/yr)	Remaining Load (lbs/yr)
Green Roof (Level 1)	ESDv credit is based on roof thickness	0	0	N/A	0	0	45%	0%	0.00	0.00	0.00
Green Roof (Level 2)	ESDv credit is based on roof thickness	0	0	N/A	0	0	60%	0%	0.00	0.00	0.00
Pemeable Pavement (A Soils)	ESDv credit is based on subbase thickness	0	0	N/A	0	0	80%	0%	0.00	0.00	0.00
Pemeable Pavement (B Soils)	ESDv credit is based on subbase thickness	0	0	N/A	0	0	80%	0%	0.00	0.00	0.00
Pemeable Pavement (C Soils)	ESDv credit is based on subbase thickness	0	0	N/A	0	0	40%	0%	0.00	0.00	0.00
Rainwater Harvesting	ESDv credit is based on design storage volume and annual use	0	0	0	0	0	45%	0%	0.00	0.00	0.00
Submerged Gravel Wetlands	ESDv credit is based on design storage volume	137,765	18,265	0	18,265	0	60%	79%	4.56	3.59	0.98
Micro-Infiltration/Dry Wells	ESDv credit is based on design storage volume	0	0	0	0	0	65%	0%	0.00	0.00	0.00
Rain Gardens (A/B Soils)	ESDv credit is based on design storage volume	0	0	0	0	0	65%	0%	0.00	0.00	0.00
Rain Gardens (C/D Soils)	ESDv credit is based on design storage volume	0	0	0	0	0	25%	0%	0.00	0.00	0.00
Micro-Bioretention (A/B Soils)	ESDv credit is based on design storage volume	0	0	0	0	0	75%	0%	0.00	0.00	0.00
Micro-Bioretention (C/D Soils)	ESDv credit is based on design storage volume	0	0	0	0	0	50%	0%	0.00	0.00	0.00
Landscape Infiltration	ESDv credit is based on design storage volume	0	0	0	0	0	75%	0%	0.00	0.00	0.00
Grass Swales (A/B Soils)	ESDv credit is based on design storage volume	0	0	0	0	0	40%	0%	0.00	0.00	0.00
	ESDv credit is based on design storage										

Grass Swales (C/D Soils)	volume	0	0	0	0	0					20%	0%	0.00	0.00	0.00		
Bio-swales (A/B Soils)	ESDv credit is based on design storage volume	0	0	0	0	0					75%	0%	0.00	0.00	0.00		
Bio-swales (C/D Soils)	ESDv credit is based on design storage volume	0	0	0	0	0					50%	0%	0.00	0.00	0.00		
Wet Swales	ESDv credit is based on design storage volume	0	0	0	0	0					40%	0%	0.00	0.00	0.00		

Step 7: Check for ESDv to MEP compliance and Revise Site If Necessary

Drainage Area Treated (sf)	137,765
WQv or ESDv Treated (cf)	18,265
P_E achieved (inches)	2.61
Total Load Reduction (lbs P / year)	3.59
Total Load Reduction Remaining (lbs P / yr)	**0.00**
Entire ESDv Treated Through Environmental Site Design?	**YES**
ESDv Remaining? (cf)	**0**
If ESDV is not fully treated, is ESD to MEP achieved?	
Redevelopment WQv Requirements Met Through Environmental Site Design?	**N/A**
WQv Remaining? (cf)	**0**
New Development WQv Requirements Met Through Environmental Site Design?	**YES**
WQv Remaining? (cf)	**0**

New Development Water Quality Volume Requirements

Required Treatment Area (acres)	3.39
Runoff Coefficient, Rv	0.57
Water Quality Volume, WQv (cf)	**7,011**

Step 8: Determine Reduced RCN and Volume Management Requirements Based Upon P_E Achieved

Reduced RCN for Type A Soils	N/A
Reduced RCN for Type B Soils	N/A
Reduced RCN for Type C Soils	N/A
Reduced RCN for Type D Soils	N/A
Composite Reduced RCN	**N/A**
Q_E (in) for Reduced RCN	N/A
V (ft^3) for Reduced RCN	N/A
Volume Management Required (cf)	**0**

Q_E (in) for RCN of 55	0.12
V (ft^3) for RCN of 55	1521

Step 9: Select Structural Practices to Meet Volume Management Requirements

Critical Area Credits

Structural Practices	Contributing Drainage Area (sf)	% Impervious Cover	Direct ESDv Received by Practice (cf)	ESDv from Upstream Practices (cf)	Treatment Volume (cf)	Phosphorous Removal Efficiency	Adjusted Phosphorus Removal Efficiency	P Load to Practice (lbs/yr)	Load Reduction (lbs/yr)	Remaining Load (lbs/yr)
Stormwater Ponds (Level 1)	0	0%	0	0	0	50%	0%	0.00	0.00	0.00
Stormwater Ponds (Level 2)	0	0%	0	0	0	75%	0%	0.00	0.00	0.00
Stormwater Wetlands (Level 1)	0	0%	0	0	0	50%	0%	0.00	0.00	0.00
Stormwater Wetlands (Level 2)	0	0%	0	0	0	75%	0%	0.00	0.00	0.00
Stormwater Filtering Systems (Level 1)	0	0%	0	0	0	60%	0%	0.00	0.00	0.00
Stormwater Filtering Systems (Level 2)	0	0%	0	0	0	65%	0%	0.00	0.00	0.00
Stormwater Infiltration (Level 1)	0	0%	0	0	0	60%	0%	0.00	0.00	0.00
Stormwater Infiltration (Level 2)	0	0%	0	0	0	90%	0%	0.00	0.00	0.00

Total structural CPv provided	0
Management Requirement Met?	**YES**
Volume Remaining (cf)	**0**

Total Load Reduction (lbs P / year)	3.59
Total Load Reduction Remaining (lbs P / yr)	**0.00**

Supplemental Waiver Request Application

Waiver Request Type

Sidewalk ☐	Parking Spaces ☐	Parking/Aisle Dimension ☐
Landscaping & Buffering ☒	Signage ☐	Other ☐

Project Information

Address	8275 Ocean Gateway, Easton, MD 21601						
Tax Map	103	Grid	EA	Parcel	2861	Lot	
Zoning District	GC	PC Meeting Date	3/20/25	Historic District	Yes ☐	No ☒	
Owner or Agent	Delmarva Real Estate Management Group, LLC c/o Curtis Snyder Agent: Lane Engineering, LLC						
Mailing Address	1807 Chancellor Point Road, Trappe, MD 21673						
Telephone No.	443-523-5620	Email	bewing@leinc.com; curtis.snyder@delmarvarealestatemanagement.com				

Request Details

Please attach a detailed description of the waiver request(s) being made and the justification(s) for requesting said waiver(s).

The proposed project is a redevelopment of an existing fast-food restaurant site to establish a new fast-food restaurant (Zaxbys Easton). The site is currently not compliant with the landscaping code. We are adding new landscaping, however, site limitations prevent full compliance with §28-1014.6.E: Overall trees - 26 trees required, 21 provided, requesting waiver of 5 trees; §28-1014.7.E Bufferyard - 6 canopy trees required, 2 provided, waiver of 4 trees; 3 evergreen trees required, 1 provided, waiver of 2 evergreen trees.

☐ Ordinance Section Supporting Waiver Request. §28-1014.6, 1014.7

Any modifications during review shall warrant an updated application.

I do hereby solemnly declare and affirm that the information provided by this application and the documents attached hereto accurately represent the conditions of the request and that submission of an incomplete application will be returned for correction prior to processing.

PROJECT DATA

PROPERTY: 8275 OCEAN GATEWAY
EASTON, MD 21601

PREPARED FOR: DELMARVA REAL ESTATE MANAGEMENT GROUP, LLC
C/O CURTIS S. SNYDER, ESQ.
1807 CHANCELLOR POINT ROAD
TRAPPE, MD 21673
(443) 523-5620

ZONING: GC (GENERAL COMMERCIAL)

SITE AREA: 37,763 SF±

PROJECT NOTES

THE IMPROVEMENTS AS SHOWN HEREON ARE BASED UPON DEEDS AND PLATS OF RECORD IN CONJUNCTION WITH COUNTY AERIAL IMAGERY, AND AN AS-BUILT COMPLETED BY CAS BAZIS AND ASSOCIATES ON JUNE 5, 1984.

THE CONTOURS SHOWN HEREON WERE TAKEN FROM TOPOGRAPHY PROVIDED BY TALBOT COUNTY, MARYLAND AND ARE APPROXIMATE ONLY.

THE PROPERTY SHOWN HEREON LIES ENTIRELY OUTSIDE OF THE CHESAPEAKE BAY CRITICAL AREA AS SHOWN ON THE TALBOT COUNTY CRITICAL AREA MAPS IN ACCORDANCE WITH TALBOT COUNTY BILL No. 1295, ENACTED AUGUST 12, 2014.

THE PROPERTY SHOWN HEREON IS NOT LOCATED IN THE NATIONAL FLOOD INSURANCE PROGRAM (NFIP) SPECIAL FLOOD HAZARD AREA (SFHA) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD. THE PROPERTY IS MAPPED IN THE "X" FLOOD ZONE AS SHOWN ON THE FEDERAL INSURANCE RATE MAPS FOR COMMUNITY NO. 240067, MAP NO. 24041C0193C FOR THE TOWN OF EASTON, MARYLAND. THE 1% ANNUAL CHANCE FLOOD (100-YEAR FLOOD), ALSO KNOWN AS THE BASE FLOOD, IS THE FLOOD THAT HAS A 1% CHANCE OF BEING EQUALED OR EXCEEDED IN ANY GIVEN YEAR. THE SFHA IS THE AREA SUBJECT TO FLOODING BY THE 1% ANNUAL CHANCE FLOOD. THE SFHA INCLUDE ZONES A, AE, AH, AO, AR, A99, V & VE. THE BASE FLOOD ELEVATION (BFE) IS THE WATER SURFACE ELEVATION OF THE 1% ANNUAL CHANCE FLOOD. FLOOD INSURANCE MAY BE REQUIRED FOR STRUCTURES LOCATED IN THE SPECIAL FLOOD HAZARD AREA.

FLOOD ZONE LEGEND
ZONES A, AE, AH, AO, AR, A99, V & VE – 1% ANNUAL CHANCE FLOOD
ZONE X (SHADED) – 0.2% ANNUAL CHANCE FLOOD
ZONE X – AREA OUTSIDE THE 0.2% ANNUAL CHANCE FLOOD

THE FLOOD DATA SHOWN HEREON IS BASED ON AVAILABLE MAPPED AND/OR DIGITAL INFORMATION AND IS DEPICTED AS DIRECTED AND REQUIRED BY FEDERAL, STATE AND LOCAL REGULATIONS. IT IS SUBJECT TO DATA INACCURACIES AND REGULATORY CHANGE AND SHOULD BE VERIFIED PRIOR TO FINALIZING DEVELOPMENT OR IMPROVEMENT PLANS FOR THE SUBJECT LANDS.

EXISTING CONDITIONS: A COMMERCIAL PROPERTY CURRENTLY UTILIZED WITH A FAST-FOOD RESTAURANT (WENDY'S).

PROPOSED DEVELOPMENT: THE PROPOSED PROJECT IS TO REVITALIZE AND REDEVELOP THE EXISTING PARCEL 2861 AS SHOWN HEREON TO ACCOMMODATE A NEW FAST-FOOD RESTAURANT (ZAXBYS)

STORMWATER MANAGEMENT: STORMWATER QUANTITY/QUALITY CONTROL WILL BE ADDRESSED THROUGH ESD FEATURES (PERMEABLE PAVERS) AS REQUIRED AND DETAILED IN THE CONCEPT SWM REPORT INCLUDED WITH THIS SKETCH SITE PLAN. THE PROPERTY IS WITHIN THE TANYARD BRANCH WATERSHED.

LOT COVERAGE: ALL BUILDINGS AND STRUCTURES SHALL NOT EXCEED 50% OF THE LOT AREA.

TOTAL STRUCTURE LOT COVERAGE: 3,580 SF (9.5%)

SPECIAL EXCEPTIONS/VARIANCES: NONE

REFUSE/TRASH: DUMPSTER AREA AND SCREENING AS SHOWN HEREON.

SITE LIGHTING: EXISTING ONSITE. ALL PROPOSED LIGHTING, UNLESS OTHERWISE APPROVED BY THE PLANNING COMMISSION, SHALL BE SHARP CUT-OFF SHIELDED LUMINARIES ON 18' HEIGHT POLES MAX. LIGHT SHALL NOT SHINE OFF-SITE AT LEVELS GREATER THAN 1 FOOT CANDLE.

FOREST CONSERVATION: THE SITE IS UNDER 40,000 SQUARE FEET AND IS THEREFORE EXEMPT.

BUILDING HEIGHT: NOT TO EXCEED 50'

PARKING

EXISTING PARKING: 1 STORY FAST-FOOD RESTAURANT @ 1/100 SF GFA: 3,044 SF/100 = 30 SPACES MINIMUM
1 STORY FAST-FOOD RESTAURANT @ 1/50 SF GFA: 3,044 SF/50 = 61 SPACES MAXIMUM

45 REGULAR PARKING SPACES + 2 ADA ACCESSIBLE PARKING SPACES PROVIDED

PROPOSED PARKING: 1 STORY FAST-FOOD RESTAURANT @ 1/100 SF GFA: 2,005 SF/100 = 20 SPACES MINIMUM
1 STORY FAST-FOOD RESTAURANT @ 1/50 SF GFA: 2,005 SF/50 = 40 SPACES MAXIMUM

TOTAL SPACES PROVIDED: 20 SPACES PROVIDED

BIKE RACKS REQUIRED: FAST-FOOD RESTAURANT – 1 BIKE SPACE/10 VEHICLE SPACES: 2 BIKE SPACES REQUIRED

SITE NOTES

ZONING CLASSIFICATION: CG (GENERAL COMMERCIAL)

SETBACKS:		PROPOSED RESTAURANT (FAST-FOOD)
FRONT-	40'	50'±

COMPREHENSIVE PLAN DESIGN PRINCIPLES RESPONSE NARRATIVE

PRINCIPLE #1- INTEGRATED USES ARE DESIRABLE- THIS PLAN PROPOSES TO REDEVELOP A SITE THAT IS CURRENTLY UTILIZED AS A FAST-FOOD INTO ANOTHER FAST-FOOD RESTAURANT. THIS USE IS ESPECIALLY PREVALENT ALONG THE ROUTE 50 CORRIDOR.

PRINCIPLE #2- NATURAL FEATURES SHOULD DETERMINE DESIGN- THE PROPOSED DEVELOPMENT INTENDS TO MIMIC THE EXISTING BOUNDARIES OF THE PARKING LOT IN ORDER TO AVOID ADDING IMPERVIOUS AREAS AND ALSO INCLUDES THE MITIGATION OF STORMWATER THAT WAS NOT PREVIOUSLY INTEGRATED ON SITE.

PRINCIPLE #3- AUTOMOBILES SHOULD NOT DETERMINE DESIGN- N/A TO DRIVE-THRU RESTAURANT PERMITTED IN THE CG DISTRICT

PRINCIPLE #4- AMPLE OPEN SPACES SHOULD BE PROVIDED WITHIN & AROUND NEIGHBORHOODS- N/A

PRINCIPLE #5- ARCHITECTURE SHOULD RESPECT EASTON'S HISTORICAL DEVELOPMENT- THIS APPLICATION PROPOSES ARCHITECTURE IMPROVEMENTS COMPATIBLE WITH EXISTING ROUTE 50 CORRIDOR IMPROVEMENTS.

PRINCIPLE #6- SIGNS SHOULD INFORM BUT NOT DOMINATE- SIGNAGE WILL COMPLY WITH BASE ZONING REQUIREMENTS;

PRINCIPLE #7- NEIGHBORHOODS SHOULD CONTAIN A DIVERSITY OF HOUSING TYPES- NOT APPLICABLE TO THIS APPLICATION

PRINCIPLE #8 RESIDENTIAL NEIGHBORHOODS SHOULD BE INTERESTING PLACES- NOT APPLICABLE TO THIS APPLICATION

PRINCIPLE #9- NEIGHBORHOODS SHOULD CONNECT- NOT APPLICABLE TO THIS APPLICATION

LANDSCAPE REQUIREMENTS SUMMARY PER ZONING ORDINANCE:

SECTION 1014.6.C.:

STREET TREES @ 1 TREE/70' OF STREET FRONTAGES = NOT APPLICABLE; NONE PROVIDED

SECTION 1014.6.E.:

1. OVERALL TREES: 1 TREE/1500 SQ FT DISTURBED AREA; 37,763 SF SQ FT/1500 = 26 TREES REQUIRED; 21 PROVIDED, WAIVER REQUEST FOR 5 TREES

2.B. INTERIOR PARKING LOT PLANTINGS: NOT APPLICABLE

2.C. PARKING LOT HEDGE: AS SHOWN

2.D.I. BUILDING FAÇADE PLANTINGS: ONE TREE/50' OF APPLICABLE ENTRANCE FAÇADE ALONG US ROUTE NO. 50; FRONTAGE 50'/50

2.D.II. FAÇADE LANDSCAPE BEDS: 25% OF APPLICABLE FAÇADE = LANDSCAPE BEDS PROVIDED

2.E. SERVICE LOADING AREA SCREENING: PROVIDED AS SHOWN

2.F. SHRUB/GROUNDCOVER PLANTINGS: PROVIDED AS SHOWN

SECTION 1014.7.E.:

25' WIDE LANDSCAPE BUFFERYARD 'B' (ALONG US ROUTE 50)
214 LF LESS ACCESS ENTRANCES & UTILITY EASEMENT (71 LF)= 143 LF / 50' = 2.86 PLANT UNITS (PU)

2 SHADE/ CANOPY TREES X 2.86 PU = 6 SHADE/ CANOPY TREES REQUIRED; 2 CANOPY TREES PROVIDED, WAIVER REQUEST FOR 4 CANOPY TREES

1 EVERGREEN TREES X 2.86 PU = 3 EVERGREEN TREES REQUIRED, 1 EVERGREEN TREE PROVIDED WAIVER REQUEST FOR 2 EVERGREEN TREES

Introduction

This report addresses the impacts of stormwater runoff as a result of the proposed re-development of the former Wendy's site located in Easton, MD. This stormwater management plan incorporates the requirements of the 2000 Maryland Stormwater Design Manual Volumes I and II (Manual) as currently updated. This report addresses stormwater requirements and meets the intent of the guidelines and methodologies presented in the MDE document Environmental Site Design (ESD) Process & Computations dated July 2010.

General Site Information

The project reference is Tax Map 103, Tax Parcel 2861 at 8275 Ocean Gateway with GC (General Commercial) zoning. The property has been previously developed as a franchise restaurant (Wendys) with associated parking & access to US 50. The Limit of Disturbance (LOD) associated with the restaurant re-development is 0.866 acres±. The project site is located entirely outside of the Chesapeake Bay Critical Area. Refer to the Site Improvement Plans for more detailed site information.

Figure 1: Aerial View of Site

Existing Conditions

The project is located north of the existing MDOT SHA District shop on westbound Ocean Gateway (US 50). This site is previously developed with a restaurant, drive through, and parking lot. Most of the site is covered in impervious surface and is already served by utilities.

In general, the property is relatively flat with the existing building in the center of the lot creating a high point to shed water toward the edges of the property. Unmanaged drainage runoff leaves the site in four (4) locations along the curb line bounding the parking lot.

The site is mapped as Urban soils according to USDA soil maps. Urban soils are assumed to act as Hydrologic Group D soils in absence of additional geotechnical evaluations that will be included in the preliminary stormwater report phase.

Proposed Project

The existing access points & improvements within the MDOT SHA Right-of-Way will be retained. All existing onsite improvements will be removed.

A new Zaxby's restaurant & drive-thru will be constructed with 20 parking spaces for interior dining, a reduction from the approximately 45 spaces currently onsite and reflective of current dining trends. Updated landscaping, accessible parking, and utility connections will be provided.

In general, the existing use, function, and operation of the property will remain, but with updated materials and aesthetics for the current market.

Stormwater Management

There are four primary drainage areas within the development area – providing one point of interest (POI) roughly on each corner of the property. Two drain toward the MDOT SHA right of way and two drain toward neighboring properties. No quantitative or qualitative management is currently provided by the existing site.

The property sits within the Tanyard Branch Watershed and is therefore subject to additional quantitative requirements as practicable onsite.

The stormwater management quality and quantity computations and management compliance are based on the overall proposed limits of disturbance (LOD) area, land cover and curve numbers, soil types, runoff characteristics and other parameters as required.

Stormwater Quantity Management

The existing property is dominated by impervious coverage with runoff leaving the site completely unmanaged. Under the baseline quantity controls described by the Manual, any reduction in lot coverage or other form of onsite management would provide an implicit reduction in the total 2- and 10-year runoff from the site.

However, the Town of Easton's Tanyard Branch ordinance, as currently written, requires management of the 10-year post development runoff down to the 2-year predevelopment condition. Under many circumstances this criterion can be met, generally with larger ponding volumes to be retained in micro-scale practices on-site.

In the case of the current project, there is minimal room to construct micro-scale practices without substantial degradation of existing site functionality and vehicular access – to accommodate a micro-bioretention or similar feature would result in further reductions to parking & drive-thru access making the site unviable as a franchise restaurant.

Lacking a deep storm drain system adjacent to the site also limits options for retaining storage using underground practices or other less conventional systems.

The project team & ownership have met with Town Engineering staff prior to this report and the development of concept plans. Based on the constraints of the site, it has been agreed to provide a 10% reduction of runoff for the net project as a quantity management goal that works toward the intent of the Tanyard Branch ordinance but as practicable onsite. Each POI must also be a reduction from current conditions per Town staff for the 2 and 10 year events.

For the purposes of this concept report, the minimum functional conditions of the proposed pavers, as described in MDE's Environmental Site Design Process & Computations guidance, is assumed. Using permeable pavers throughout the project site and assuming a minimum effective reduced curve number (RCN) of 70 for pavers with a 12" stone base, the above goals are met. Additional geotechnical evaluation may indicate these pavers will function with a better RCN if onsite soils are more conducive to infiltration – additional stormwater methodology for quality and quantity may also become viable.

The site was analyzed using HydroCAD software, with the following results:

Study Point	***Peak Runoff (cfs)***					
	2-year		***10-year***		***100-year***	
	Pre	***Post***	***Pre***	***Post***	***Pre***	***Post***
1	1.22	0.94	1.98	1.63	2.88	2.45
2	1.28	1.11	2.05	1.68	2.97	3.02
3	0.85	0.75	1.38	1.35	2.02	2.07
4	0.89	0.68	1.45	1.20	2.12	1.83
Total Runoff Leaving Site	**4.24**	**3.48**	**6.86**	**6.16**	**9.99**	**9.37**
10% Reduction of Ex Runoff	**4.24 x 90% = 3.816**		**6.86 x 90% = 6.174**		**--**	
Goal met?	**3.48 < 3.816 (OK)**		**6.16 < 6.174 (OK)**		**--**	

As seen above, the peak runoff leaving the project site at all study points will be reduced under proposed conditions for the 2 and 10 year storm events. The 10% net reduction of the project runoff is also met. Flow velocities for both study points for all storm events are non-erosive.

Please see Appendices A for quantity management calculations and see Appendix C for drainage area maps.

Stormwater Quality Treatment

Existing onsite coverage is 29,926± sf (79.33%) of a 0.866-acre (37,723± sf) parcel. As such, the project qualifies for stormwater re-development (existing impervious coverage is greater than 40%) whereby half of all existing impervious surface (29,926 ± sf x ½ = 14,962± sf) must either be treated to a P_E of 1.0 inch or removed.

The proposed project, in part to meet the requirements of Tanyard Branch as discussed above, will employ significant alternative surfaces (permeable pavers) which are not considered impervious surfaces by the Manual. The result is a post construction lot coverage of 20,023± sf. Therefore, the proposed development results in a reduction in onsite impervious coverage by 9,903± sf which is deducted from the 14,962± sf impervious surface treatment target. The remaining coverage, 5,059± sf, in conjunction to a P_E of 1.0 inch is used to develop a site target of 401 cf.

The pavers will utilize a 12" stone base that provides 0.16 cf of ESD_v per square foot of pavement. Employing 9,957 sf of pavers throughout the site results in a treatment volume of 1,536 cf. Please see Appendix B for additional information.

The objective of stormwater quality treatment is to provide the target ESDv using Environmental Site Design (ESD) features/practices to the Maximum Extent Practicable (MEP) before utilizing structural stormwater practices from Chapter 3 of the Manual.

ESD Practices Evaluation

Alternative Surfaces

- Green Rooftops – The restaurant project employs a specific architectural aesthetic as part of their corporate brand. A green roof is not readily incorporated into this architecture and would also require significant maintenance in the long term.
- **Permeable Pavements** – Permeable pavements are ideal for redevelopment projects as they both reduce stormwater runoff and do not count towards onsite impervious coverage. Given site constraints and the desire to maximize vehicular use, permeable pavements are ideal for this project.
- Reinforced Turf - Reinforced turf areas are commonly used for emergency equipment access or for areas that receive minimal vehicular use. Not applicable for a site dominated by vehicular use.

Nonstructural practices

- Disconnection of Rooftop Runoff – Not enough onsite greenspace (existing or proposed) to employ this practice to substantial effect.
- Disconnection of Non-Rooftop Runoff – Not enough onsite greenspace (existing or proposed) to employ this practice to substantial effect.
- Sheetflow to Conservation Area – Not applicable; No conservation areas are within or adjacent to the project.

Micro-scale practices

- Rainwater Harvesting – Opportunities for on-site reuse of harvested rainwater are limited. Operations and maintenance, especially during cold-weather periods, is also a concern.
- Submerged Gravel Wetlands – Onsite space is limited for micro-scale practices without reducing the overall functionality & onsite circulation of the project.
- Landscape Infiltration – There is potential for a form of infiltration-based practices, however, soil maps show onsite conditions as urban. Additional soil investigation may present an opportunity to implement this practice in the preliminary design phase of this project, if in-situ conditions support it.
- Infiltration Berms – The requirements of the proposed development do not leave enough room for the implementation of this practice.
- Dry Wells – This could be a viable practice, contingent upon additional geotechnical investigations.
- Micro-Bioretention – Onsite space is limited for micro-scale practices without reducing the overall functionality & onsite circulation of the project.
- Rain Gardens – This practice is better suited for residential environments.
- Swales – swales do not fit within the constraints of the site.

Permeable Pavers (A-2) are proposed to address the ESDv requirement. The total ESDv provided by these practices is 1,536 cf, which is greater than the 401 cf required. Therefore, ESD has been achieved to the MEP. Refer to Appendix B for calculations.

Conclusion

This stormwater management analysis indicates that the proposed design will successfully meet stormwater quality and quantity requirements. It is respectfully requested that the stormwater analysis and report and project design be approved as presented.

*	1,495	70	Perm. Pavers
	7,300	87	Weighted Average
	3,596		49.26% Pervious Area
	3,704		50.74% Impervious Area

Tc (min)	Length (feet)	Slope (ft/ft)	Velocity (ft/sec)	Capacity (cfs)	Description
1.5					**Direct Entry, Matches Ex TC**

Subcatchment P-DA4: Prop. SW Area to POI-4 (Rt.50)

APPENDIX B

ESD CALCULATIONS

ESD SITE TARGET

EARTHEN DISTURBANCE (LOD) = 37,723 SF; ASSUMED AS ENTIRE PARCEL 0.866 ACRES

EXISTING IMPERVIOUS 29,926 SF (79.33%); PROJECT QUALIFIES FOR REDEVELOPMENT ($I_{EXISTING}$ >40%)

ONSITE SOILS ARE MAPPED AS "URBAN" – ASSUME COMPACTED SOILS FUNCTION AS HYDROLOGIC GROUP "D"

TREAT, TO A P_E OF 1.0", OR REMOVE 50% OF EXISTING IMPERVIOUS SURFACE:

HALF EXISTING COVERAGE = 29,926 SF X ½ = 14,962 SF TO BE TREATED OR REMOVED

PROPOSED DEVELOPMENT = 20,023 SF; 9,903 SF REMOVED

REMAINING IMPERVIOUS TO BE TREATED = 5,059 SF

R_V = 0.95, P_E = 1.0"

$ESD_{V\ (HALF\ EXISTING)} = \frac{(Pe)(Rv)(A)}{12} = \frac{(1.0)(0.95)(5{,}059)}{12}$ = **401 CF**

PERMEABLE PAVERS (A-2)

PER MDE ENVIRONMENTAL SITE DESIGN (ESD) PROCESS & COMPUTATIONS TABLE 1

12" GRAVEL SUBBASE YIELDS 0.16 ESD_V PER FT^2

9597 SF X 0.16 CF/SF = **1,536 CF**

WARNING!!

THE LOCATIONS OF EXISTING UTILITIES AS SHOWN ON THIS PLAN ARE APPROXIMATE ONLY. THE CONTRACTOR SHALL VERIFY THE LOCATION AND DEPTH OF EXISTING UTILITIES PRIOR TO BEGINNING CONSTRUCTION. THE QUANTITIES SHOWN ON THIS PLAN ARE FOR INFORMATIONAL AND PERMITTING PURPOSES ONLY. THE CONTRACTOR SHALL VERIFY ALL QUANTITIES TO HIS OWN SATISFACTION PRIOR TO BEGINNING CONSTRUCTION.

THE CONTRACTOR SHALL TEST PIT AND LOCATE EXISTING UNDERGROUND UTILITIES PRIOR TO THE BEGINNING OF ANY WORK ON-SITE. THE CONTRACTOR SHALL NOTIFY DEPT. OF PUBLIC WORKS OF ANY POSSIBLE CONFLICT AND REQUEST THE RELOCATION OF THE EXISTING UNDERGROUND UTILITIES BEFORE BEGINNING ANY WORK ON-SITE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY RELOCATION EXPENSE.
